Subject Index

Acidity
Isomerization of *o*-dichlorobenzene over H-mordenite. Effect of the silicon-to-aluminium ratio 285
Adsorption
Ammonia adsorption on vanadia supported on titania–silica catalyst. An infrared spectroscopic investigation 81
Ageing
Carbon-supported, (alkali metal) ($Fe_2Mn(CO)_{12}$)-derived catalysts. Adsorption properties and catalytic behavior in carbon monoxide hydrogenation 93
Ageing
Manganese oxide water–gas shift catalysts. Initial optimization studies 127
Ageing
Activity decaty of potassium-promoted iron oxide cataiyst for dehydrogenation of ethylbenzene 203
Ammonia adsorption
Ammonia adsorption on vanadia supported on titania–silica catalyst. An infrared spectroscopic investigation 81
Antimony
Effect of added Sb_2O_4, $BiPO_4$ or SnO_2 on the catalytic properties of $ZnFe_2O_4$, in the oxidative dehydrogenation of butene to butadiene 235
Aromatization
Aromatization of n-hexane over Pt-KL catalyst L7

Bismuth
Effect of added Sb_2O_4, $BiPO_4$ or SnO_2 on the catalytic properties of $ZnFe_2O_4$ in the oxidative dehydrogenation of butene to butadiene 235
Butane dehydrogenation
Effect of added Sb_2O_4, $BiPO_4$ or SnO_2 on the catalytic properties of $ZnFe_2O_4$ in the oxidative dehydrogenation of butene to butadiene 235
Butane oxidation
Regeneration of a P-V-O-Zn butane oxidation catalyst using chlorine containing hydrocarbons 13

Carbon monoxide hydrogenation
Carbon-supported, (alkali metal) ($Fe_2Mn(CO)_{12}$)-derived catalysts. Adsorption properties and catalytic behavior in carbon monoxide hydrogenation 93
Carbon tetrachloride
Regeneration of a P-V-O-Zn butane oxidation catalyst using chlorine containing hydrocarbons 13
Catalyst characterization
Synthesis and characterization of the very large pore molecular sieve MCM-9 L13
Catalyst characterization (Electron probe, Hg porosimetry, BET)
Thiophene hydrodesulfurization of fresh, spent, and treated catalysts 295
Catalyst characterization (EXAFS)
X-ray absorption study of vanadium on regenerated catalytic-cracking catalysts 255
Catalyst characterization (IR)
Ammonic adsorption on vanadia supported on titania–silica catalyst. An infrared spectroscopic investigation 81
Catalyst characterization (Mössbauer spectroscopy, TPD)
Morphology and catalytic activity of FeRe bimetallic catalysts supported on silica. II. Catalytic activity in the carbon monoxide–hydrogen reaction 49
Catalyst characterization (Mössbauer spectroscopy)
Sulfidation of carbon-supported iron oxide catalyst 263
Catalyst characterization (spectroscopic techniques, TPR)
Morphology and catalytic activity of iron–rhenium bimetallic catalysts supported on silica. I. Temperature-programmed reduction, X-ray photoelectron spectroscopy and Mössbauer study 33
Catalyst characterization (spectroscopic techniques, TPR)
Vanadia supported on titania–silica: Physical characterization and activity for the selective reduction on nitric oxide 67
Catalyst characterization (spectroscopic techniques)

Methanol synthesis on monovalent copper species stabilized on silica and zinc oxide 141
Catalyst characterization (temperature-programmed techniques)
Promoting effects of lithium on Pd/CeO_2 catalysts in carbon monoxide–hydrogen reactions: Chemical trapping and temperature-programmed desorption studies 165
Catalyst characterization (Temperature-programmed techniques)
Effect of thermal treatment on the reducibility of alumina-supported nickel catalysts 223
Catalyst characterization (XRD)
Regeneration of a P-V-O-Zn butane oxidation catalyst using chlorine containing hydrocarbons 13
Catalyst characterization (XRD, TEM)
Effect of added Sb_2O_4, $BiPO_4$ or SnO_2 on the catalytic properties of $ZnFe_2O_4$ in the oxidative dehydrogenation of butene to butadiene 235
Catalyst preparation
Synthesis and characterization of the very large pore molecular sieve MCM-9 L13
Catalyst preparation (citric acid method)
Effect of added Sb_2O_4, $BiPO_4$ or SnO_2 on the catalytic properties of $ZnFe_2O_4$ in the oxidative dehydrogenation of butene to butadiene 235
Catalyst preparation (evaporation)
Vanadia supported on titania–silica: Physical characterization and activity for the selective reduction on nitric oxide 67
Catalyst preparation (incipient wetness)
Effect of the preparation on the activity and selectivity of supported nickel catalysts 1
Catalyst preparation (incipient wetness)
Sulfidation of carbon-supported iron oxide catalysts 263
Catalyst preparation (mechanical mixing)
Synergy in hydrodesulfurization and hydrogenation on mechanical mixtures of cobalt sulfide on carbon and MoS_2 on alumina L21
Catalyst preparation (simultaneous precipitation)
Oxidative coupling of methane over $LnLiO_2$ compounds (Ln = Sm,Nd,La) L1
Catalyst preparation (wet impregnation)
New catalyst for hydrocracking of vacuum residue 213
Catalytic-cracking catalysts
X-ray absorption study of vanadium on regenerated catalytic-cracking catalysts 25
Chemical trapping
Promoting effects of lithium on Pd/CeO_2 catalysts in carbon monoxide–hydrogen reactions: Chemical trapping and temperature-programmed desorption studies 165
Cobalt manganese oxide
Manganese oxide water–gas shift catalysts. Initial optimization studies 127
Cobalt–molybdena/alumina
Thiophene hydrodesulfurization on fresh, spent, and treated catalysts 295
Cobalt/carbon
Synergy in hydrodesulfurization and hydrogenation on mechanical mixtures of cobalt sulfide on carbon and MoS_2 on alumina L21
Coke formation
Contrast between H-ZSM-5 and H-Fe-silicates of the pentasil pore structure in propylene conversion 155
Coke formation
Crystallinity of coke on platinum–rhenium/alumina reforming catalyst during the commercial cycle 195
Coke formation
New catalyst for hydrocracking of vacuum residue 213
Coke formation
Isomerization of *o*-dichlorobenzene over H-mordenite. Effect of the silicon-to-aluminium ratio 285
Copper manganese oxide
Manganese oxide water–gas shift catalysts. Initial optimization studies 127
Copper–zinc/silica
Methanol synthesis on monovalent copper species stabilized on silica and zinc oxide 141
Copper/silica
Methanol synthesis on monovalent copper species stabilized on silica and zinc oxide 141

Crystallinity
Crystallinity of coke on platinum–rhenium/alumina reforming catalyst during the commercial cycle 195

Dichlorobenzene isomerization
Isomerization of *o*-dichlorobenzene over H-mordenite. Effect of the silicon-to-aluminium ratio 285
Diphenylmethane
Zeolites in organic reactions. Condensation of formaldehyde with benzene in the presence of HY zeolites 113

Ethylbenzene dehydrogenation
Activity decay of potassium-promoted iron oxide catalyst for dehydrogenation of ethylbenzene 203

Formaldehyde–benzene condensation
Zeolites in organic reactions. Condensation of formaldehyde with benzene in the presence of HY zeolites 113

Hexane aromatization
Aromatization of n-hexane over Pt-KL catalyst L7
HY zeolites
Zeolites in organic reactions. Condensation of formaldehyde with benzene in the presence of HY zeolites 113
Hydrocracking catalysts
New catalyst for hydrocracking of vacuum residue 213
Hydrodesulphurization
Synergy in hydrodesulfurization and hydrogenation on mechanical mixtures of cobalt sulfide on carbon and MoS_2 on alumina L21
Hydrodesulphurization
Sulfidation of carbon-supported iron oxide catalysts 263
Hydrodesulphurization
Thiophene hydrodesulfurization on fresh, spent, and treated catalysts 295
Hydrogenation
Synergy in hydrodesulfurization and hydrogenation on mechanical mixtures of cobalt sulfide on carbon and MoS_2 on alumina L21

Iron manganese oxide
Manganese oxide water–gas shift catalysts. Initial optimization studies 127
Iron oxide
Activity decay of potassium-promoted iron oxide catalyst for dehydrogenation of ethylbenzene 203
Iron sulphide/carbon
sulfidation of carbon-supported iron oxide catalysts 263
Iron–manganese/carbon
Carbon-supported, (alkali metal) $(Fe_2Mn(CO)_{12})$-derived catalysts. Adsorption properties and catalytic behavior in carbon monoxide hydrogenation 93
Iron–rhenium/silica
Morphology and catalytic activity of iron–rhenium bimetallic catalysts supported on silica. I. Temperature-programmed reduction, X-ray photoelectron spectroscopy and Mössbauer study 33
Iron–rhenium/silica
Morphology and catalytic activity of FeRe bimetallic catalysts supported on silica. II. Catalytic activity in the carbon monoxide–hydrogen reaction 49
Iron/allophane
New catalyst for hydrocracking of vacuum residue 213
Iron/carbon
Carbon-supported, (alkali metal) $(Fe_2Mn(CO)_{12})$-derived catalysts. Adsorption properties and catalytic behavior in carbon monoxide hydrogenation 93

Kinetics
Carbon-supported, (alkali metal) $(Fe_2Mn(CO)_{12})$-derived catalysts. Adsorption properties and catalytic behavior in carbon monoxide hydrogenation 93
Kinetics
Contrast between H-ZSM-5 and H-Fe-silicates of the pentasil pore structure in propylene conversion 155

Lanthanides–lithium
Oxidative coupling of methane over Ln-LiO_2 compounds (Ln = Sm, Nd, La) L1

Manganese oxide
Manganese oxide water–gas shift cata-

lysts. Initial optimization studies 127
Methane oxidative coupling
Oxidative coupling of methane over Ln-LiO_2 compounds (Ln = Sm, Nd, La) L1
Methanol conversion
DTA apparatus as a catalytic microreactor with on-line analysis of the products 181
Methanol synthesis
Methanol synthesis on monovalent copper species stabilized on silica and zinc oxide 141
Molecular sieves
Synthesis and characterization of the very large pore molecular sieve MCM-9 L13
Molybdenum/alumina
Synergy in hydrodesulfurization and hydrogenation on mechanical mixtures of cobalt sulfide on carbon and MoS_2 on alumina L21
Mordenite
Isomerization of *o*-dichlorobenzene over H-mordenite. Effect of the silicon-to-aluminium ratio 285

Nickel/alumina
Effect of thermal treatment on the reducibility of alumina-supported nickel catalysts 223
Nickel/silica
Effect of the preparation on the activity and selectivity of supported nickel catalysts 1
Nickel/silica-alumina
Effect of the preparation on the activity and selectivity of supported nickel catalysts 1
Nitric oxide reduction
Vanadia supported on titania-silica: Physical characterization and activity for the selective reduction on nitric oxide 67

On-line analysis
DTA apparatus as a catalytic microreactor with on-line analysis of the products 181
Oxidative coupling
Oxidative coupling of methane over Ln-LiO_2 compounds (Ln = Sm,Nd,La) L1

Palladium/ceria
Promoting effects of lithium on Pd/CeO_2 catalyst in carbon monoxide-hydrogen reactions: Chemical trapping and temperature-programmed desorption studies 165
Pentasil
Constrast between H-ZSM-5 and H-Fe-silicates of the pentasil pore structure in propylene conversion 155
Platinum-rhenium/alumina
Crystallinity of coke on platinum-rhenium/alumina reforming catalyst during the commercial cycle 195
Platinum/zeolite
Aromatization of n-hexane over Pt-KL catalyst L7
Pore radius
Crystallinity of coke on platinum-rhenium/alumina reforming catalyst during the commercial cycle 195
Pore size
Synthesis and characterization of the very large pore molecular sieve MCM-9 L13
Potassium ferrite
Activity decay of potassium promoted iron oxide catalyst for dehydrogenation of ethylbenzene 203
Product analysis
DTA apparatus as a catalytic microreactor with on-line analysis of the products 181
Propene conversion
Constrast between H-ZSM-5 and H-Fe-silicates of the pentasil pore structure in propylene conversion 155

Radioisotopes
Aromatization of n-hexane over Pt-KL catalyst L7
Reforming catalysts
Morphology and catalytic activity of iron-rhenium bimetallic catalysts supported on silica. I. Temperature-programmed reduction, X-ray photoelectron spectroscopy and Mössbauer study 33
Reforming catalysts
Crystallinity of coke on platinum-rhenium/alumina reforming catalyst during the commercial cycle 195

Regeneration
Regeneration of a P-V-O-Zn butane oxidation catalyst using chlorine containing hydrocarbon 13

Rejuvenation
Thiophene hydrodesulfurization on fresh, spent, and treated catalysts 295

Selectivity (aromatics)
Activity decay of potassium-promoted iron oxide catalyst for dehydrogenation of ethylbenzene 203
Selectivity (butadiene)
Effect of added Sb_2O_4, $BiPO_4$ or SnO_2 on the catalytic properties of $ZnFe_2O_4$ in the oxidative dehydrogenation of butene to butadiene 235
Selectivity (C_{2+} and olefin)
Morphology and catalytic activity of FeRe bimetallic catalysts supported on silica. II. Catalytic activity in the carbon monoxide–hydrogen reaction 49
Selectivity (cyclohexane)
Effect of the preparation on the activity and selectivity of supported nickel catalysts 1
Selectivity (gasoline)
Contrast between H-ZSM-5 and H–Fe-silicates of the pentasil pore structure in propylene conversion 155
Selectivity (hydrocarbons)
Carbon-supported, (alkali metal) ($Fe_2Mn(CO)_{12}$)-derived catalysts. Adsorption properties and catalytic behavior in carbon monoxide hydrogenation 93
Selectivity (methanol)
Methanol synthesis on monovalent copper species stabilized on silica and zinc oxide 141
Selectivity (mid-distillate)
New catalyst for hydrocracking of vacuum residue 213
Silicon-to-aluminium ratio
Isomerization of *o*-dichlorobenzene over H-mordenite. Effect of the silicon-to-aluminium ratio 285
Sintering
Sulfidation of carbon-supported iron oxide catalysts 263
Sulphidation
Sulfidation of carbon-supported iron oxide catalysts 263
Synergy
Synergy in hydrodesulfurization and hydrogenation on mechanical mixtures of cobalt sulfide on carbon and MoS_2 on alumina L21
Syngas conversion
Morphology and catalytic activity of FeRe bimetallic catalysts supported on silica. II. Catalytic activity in the carbon monoxide–hydrogen reaction 49
Syngas conversion
Methanol synthesis on monovalent copper species stabilized on silica and zinc oxide 141
Syngas conversion
Promoting effects of lithium on Pd/CeO_2 catalysts in carbon monoxide–hydrogen reactions: Chemical trapping and temperature-programmed desorption studies 165

Thermal treatment
Effect of thermal treatment on the reducibility of alumina-supported nickel catalysts 223
Thiophene hydrodesulphurization
Sulfidation of carbon-supported iron oxide catalysts 263
Thiophene hydrosulphurization
Thiophene hydrodesulfurization on fresh, spent, and treated catalysts 295
Tin
Effect of added Sb_2O_4, $BiPO_4$ or SnO_2 on the catalytic properties of $ZnFe_2O_4$ in the oxidative dehydrogenation of butene to butadiene 235

Vanadia/titania–silica
Vanadia supported on titania–silica: Physical characterization and activity for the selective reduction on nitric oxide 67
Vanadia/titania–silica
Ammonia adsorption on vanadia supported on titania–silica catalyst. An infrared spectroscopic investigation 81
Vanadium/silica–alumina
X-ray absorption study of vanadium on regenerated catalytic-cracking catalysts 255
Vanadyl phosphate
Regeneration of a P-V-O-Zn butane oxidation catalyst using chlorine containing hydrocarbon 13

Water–gas shift reaction
Manganese oxide water–gas shift catalysts. Initial optimization studies 127

Zeolites
Aromatization of n-hexane over Pt-KL catalyst L7

Zeolites
Zeolites in organic reactions. Condensation of formaldehyde with benzene in the presence of HY zeolites 113

Zeolites
Contrast between H-ZSM-5 and H–Fe-silicates of the pentasil pore structure in propylene conversion 155

Zeolites
DTA apparatus as a catalytic microreactor with on-line analysis of the products 181

Zeolites
X-ray absorption study of vanadium on regenerated catalytic-cracking catalysts 255

Zinc-iron oxide
Effect of added Sb_2O_4, $BiPO_4$ or SnO_2 on the catalytic properties of $ZnFe_2O_4$ in the oxidative dehydrogenation of butene to butadiene 235
